PROFESSIONAL SUMMARY

Custom Software Engineer and MCA finalist with expertise in full-stack development, quantum cryptography, and automation. Co-inventor of a UK Registered Design Patent (No. 6505034) for a Hybrid Quantum-Classical Computer Device. Proven track record in building scalable web apps, REST APIs, and automation pipelines.

EDUCATION

MCA (Master of Computer Applications)

B.P. Poddar Institute of Mgmt & Tech

2024 – 2026 | Kolkata

- SGPA: 6.68 -> 7.00 -> 8.00 (Improving)
- 4th Sem Running

B.Voc in Software Development

Asutosh College, Calcutta University

2021 – 2024 | Kolkata

- CGPA: 9.37 / 10 (Distinction)

Higher Secondary (H.S.)

R.K. Mission Shilpavidyalaya, Belur Math

2019 – 2021

Secondary (Class X)

Salkia Hindu High School

2019 – 2019

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, HTML5, CSS3, SQL

Frontend: React.js, Flask (Jinja2), Responsive UI

Backend: Node.js, REST APIs, Express.js, Flask

Databases: MySQL, MongoDB

Quantum: Qiskit, QKD, PQC, Hybrid Crypto

Automation: Email & WhatsApp Automation

ML / CV: OpenCV, Face Recognition, ML Algos

Tools: Git, GitHub, VS Code, Linux, Postman

CS Core: DSA, OS, DBMS, OOP

CERTIFICATIONS

Learning Management System (LMS)

Vivekananda College | Aug 2023 - Feb 2024

Full Stack Development

PW Skills | 2025 - Present

WORK EXPERIENCE

Full Stack Developer Intern

Flint De Orient

2025 – Present | Kolkata

- Developed web applications using React.js, Node.js, and Flask across the full SDLC
- Built RESTful APIs and responsive UIs; debugged and optimized back-end services
- Engineered Email Automation and WhatsApp Automation pipelines, reducing manual overhead
- Participated in Agile sprints, code reviews, and production deployments

PATENT & INTELLECTUAL PROPERTY

UK Registered Design Patent — Design No. 6505034

Issued by: UK Intellectual Property Office (IPO)

06/02/2026 – 20/02/2026

- Design: Hybrid Quantum-Classical Computer Device for Authentication & Protective Housing
- Class 14 — Recording, Telecom & Data Processing Equipment (Version 15-2025)

PROJECTS

Face Recognition & Attendance System

Python, OpenCV, Flask, Machine Learning

2024 – 2024

- Built real-time face detection and identity verification system using OpenCV and ML algorithms
- Designed a Flask web interface for attendance management and report generation

Hybrid QKD-PQC Cryptographic Algorithm

B.P. Poddar IMT | Python, Qiskit, QKD, PQC

- Designed a hybrid cryptographic model combining QKD and PQC for quantum-era secure communications
- Simulated using Qiskit; evaluated key exchange robustness and resistance to quantum/classical attacks
- Work resulted in UK Registered Design Patent No. 6505034 (Feb 2026)

INTERESTS

Football | Swimming | Singing |

Quantum Research | Open Source

DECLARATION

Statement

- I declare that all information provided is true and accurate to the best of my knowledge.
